

DEPARTMENT OF AGRICULTURE AND TECHNICAL
INSTRUCTION FOR IRELAND.

AGRICULTURAL STATISTICS

OF

IRELAND,

WITH DETAILED REPORT FOR THE YEAR
1905.

Presented to both Houses of Parliament by Command of His Majesty.

DUBLIN:
PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEXANDER THOM & CO. (LIMITED), ABBEY-STREET.

And to be purchased, either directly or through any Bookseller, from
E. PONSONBY, 114, GRAFTON-STREET, DUBLIN; or
WYMAN AND SONS, LTD., FETTER-LANE, E.C., and
22, ABINGDON-STREET, WESTMINSTER, S.W.; or
OLIVER & BOYD, EDINBURGH.

1905.

[Cd. 3173.] Price, 11d.

SALE OF GOVERNMENT PUBLICATIONS

The under-mentioned Firms have been appointed sole Agents for the sale of Government Publications, including Parliamentary Reports and Papers, Acts of Parliament, Record Office Publications, &c., &c., (excepting Ordnance Maps and Geological Maps and Memoirs, the Hydrographical Works of the Admiralty, the Journal of the Board of Agriculture, and Patent Office Publications), and all such works can be purchased from them either directly or through road booksellers, who are entitled to a discount of 25 per cent. from the selling price:—

IN ENGLAND:—Messrs. WYMAN AND SONS, LTD., Fetter Lane, E.C.

IN SCOTLAND:—Messrs. OLIVER AND BOYD, Edinburgh.

IN IRELAND:—Mr. E. PONSONBY, 116, Grafton-street, Dublin.

Hydrographical Works of the Admiralty are sold by Mr. J. D. POTTER, 145, Minories, E.

The Journal of the Board of Agriculture is sold by Messrs. Laughton and Co., Ltd., No. 3, Wellington Street, Strand, W.C.

Patent Office Publications are sold at the Patent Office.

The Publications of the ORDNANCE SURVEY and of the GEOLOGICAL SURVEY can be purchased from Agents in most of the chief towns in the United Kingdom, through any Bookseller, or from the Director-General of the Ordnance Survey, Southampton, or, in the case of Ireland, from the Superintendent, Ordnance Survey, Dublin. In addition, Ordnance Survey Publications can be obtained through Head Post Offices in towns where there are no accredited Agents.

The following is a list of some of the more important Parliamentary and Official Publications recently issued:—

Parliamentary:

Statutes—

Public General Acts, 1906. In course of issue.

Local and Personal Acts, 1906, in course of issue; 3d. per 4 pp.

Army Act—Consolidation—including amendments to 1906.

Price 1s. 2d.

Public General, Session 1905. With Index, Tables, &c. Cloth.

Price 3s.

Index to Local and Personal Acts, 1801–1899.

Price 10s.

Index to Local and Personal Acts, 1900–1905. Each year may be purchased separately.

Second Revised Edition. 1235–1896. XVI. Vols.

Price 7s. 6d. each.

Revised Editions. Tables showing subsequent Repeals, effected by Acts of Session.

2 Edward VII. 1902.

Price 5d.

Statutes in Force. Chronological Table and Index of. 21st Edition. To the end of the Session 5 Edward VII. (1905). 2 Vols.

Price 10s. 6d.

The Statutory Rules and Orders revised. Statutory Rules and Orders, other than those of a Local, Personal, or Temporary Character, in force on December 31, 1903. Vols. I. to XIII.

Price, 10s. each.

Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character. With a List of the more important Statutory Orders of a Local Character arranged in classes; and an Index. Roy. 8vo. Boards. Issued in 1890 to 1905.

Price 10s. each.

Statutory Rules and Orders in force on 31st December, 1903. Index to.

Price 10s.

HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue

[Cd. 2825–2826.] **TRADES DISPUTES.** Report of Royal Commission, with Evidence and Appendix.

Price 4s. 6d.

[Cd. 2802, 2801, 2882.] **VAGRANCY.** Report of Departmental Committee; with Evidence, Appendix, and Index. Labour Colonies Abroad, &c.

Price 10s. 3d.

[Cd. 2932, 2933, 2934.] **LOUPOU-ILL AND BRAY.** Report of Departmental Committee, and details of Investigation.

Price 4s. 6d.

[Cd. 2959, 2960.] **RAILWAY RATES. PREFERENTIAL TREATMENT FOR FOREIGN AND COLONIAL PRODUCE.** Report of Departmental Committee, with Evidence, &c.

Price 3s. 4d.

[Cd. 2961.] **LICENSING STATISTICS, 1905. OPERATION AND ADMINISTRATION OF LAWS FOR THE SALE OF INTOXICATING LIQUORS.**

Price 1s. 7d.

[Cd. 2978, 2979.] **AGRICULTURAL SETTLEMENTS IN BRITISH COLONIES.** Report of Departmental Committee, with Evidence, &c.

Price 3s. 6d.

[Cd. 3045, 3046.] **TOWNAGE.** Royal Commission. Report, with Evidence, &c.

Price 3s. 6d.

[Cd. 3010, 3062, 3070, 3071, 3072.] **ECLESIASTICAL DISCIPLINE.** Royal Commission. Report, with Evidence and Appendices.

Price 15s. 3d.

ENDOWED CHARITIES, ENGLAND AND WALES. SEPARATE PARISHES. Reports thereon; in course of issue.

MINES. Reports of H. M. Inspectors for 1905, with Summaries of the Statistical portion under the provisions of the Coal Mines Regulation Act, 1887; Metalliferous Mines Regulation Act, 1872–1875; State Mines (Gunpowder) Act, 1882, Districts Nos. 1 to 12.

Price 3s. 9d.

MINES in the United Kingdom and the Isle of Man. List of for 1905.

Price 3s. 7d.

QUARRIES. Ditto. ditto ditto. 1905.

Price 4s. 10d.

MINES ABANDONED. Plans of, List of the. Corrected to 31st December, 1905.

AGRICULTURAL STATISTICS, IRELAND.

1905.

R E P O R T

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the detailed Annual Report on the Agricultural Statistics of Ireland for the year 1905. This Report presents in a revised and more detailed form information which has been already published in the Abstract of the Acreage of Crops and Number of Live Stock and in the subsequent Report on the Yield of Crops, while it also includes a series of special tables relating to crops, live stock, forestry operations, the size and distribution of holdings, the wages of agricultural labour, and the numbers of creameries, corn and scutch mills in Ireland in 1905. The usual arrangement of the tables has been maintained. The summary tables on pages 2-21 present the chief results of the detailed tables, as well as certain general and comparative statistics relating to agriculture.

The total area of Ireland was returned in the Census of 1901 as 20,345,328 statute acres. The inclu-

Division of Land. sion of 5,397 acres of reclaimed slob in the County Wexford brings the total area to 20,350,725 statute acres. This total includes 117,135 acres under water, but excludes close on half a million acres (487,418) under the large rivers, lakes, and tideways. The

following statement shows the division of the land in 1904 and 1905 :—

—	1904.	1905.	Increase.	Decrease.	Net Change.
Crops, Cereals (excluding Hay), ...	Acres. 1,379,189	Acres. 1,371,490	—	7,699	
Crops, Roots, and Green, ...	1,050,483	1,044,373	—	6,110	
Flax,	44,280	46,158	1,878	—	—12,244
Hay (on rotation land), ...	631,743	628,635	—	3,113	
Hay (on Permanent Meadow), ...	1,225,412	1,605,871	37,459	—	+34,346
Pasture (Temporary rotation), ...	647,416	625,478	—	21,938	
Pasture (Permanent), ...	9,939,323	9,971,513	32,190	—	+11,307
Small Frost,	4,542	4,531	19	—	+19
Fallow,	4,348	4,193	—	655	—655
Woods and Plantation, ...	303,118	301,182	—	1,936	—1,936
Bog, Waste, Barren Mountain, Water Marsh, &c., ...	4,817,483	4,785,644	—	30,839	—30,839
	20,390,725	20,390,725			

CROPS.

From the above statement it may be seen that (1) in 1905, as compared with 1904, the land under crops other than hay decreased by 12,244 acres; (2) the area under hay increased by 34,346 acres; (3) pasture increased by 11,357 acres; and (4) the area of bog, waste, and barren mountain decreased by 30,839 acres. As regards the decrease in the area of waste land, barren mountain, etc., it should be pointed out that this class of land fluctuates from year to year. In 1904 it increased by 13,231 acres; in 1905 it decreased by over twice that amount. Such fluctuations are due mainly to the fact that there is a considerable quantity of land which is on the border line between on the one hand pasture and on the other hand bog or barren mountain. One season it is classed as barren mountain, another year it may be entered as pasture. It is therefore important to judge the fluctuations of individual years in the light of the changes which have taken place in a series of years. The following table shows the area under bog, waste, and barren mountain in each of the years 1896-1905 :—

EXTENT IN ACRES UNDER TURF BOG, MARSH, BARREN MOUNTAIN, WATER, ROADS AND FENCES, &c.					
Year.	Acres.
1896	4,830,910
1897	4,795,612
1898	4,833,866
1899	4,809,206
1900	4,787,003
1901	4,804,428
1902	4,807,567
1903	4,804,252
1904	4,817,483
1905	4,786,644

From this statement it will be seen that the area while fluctuating considerably remains comparatively stationary, tending slowly to decrease.

It should also be stated with regard to the large area under bog, barren mountain, waste, &c., that this includes over 1,037,991 acres of land under water, or used for roads, fences, &c. The total area of the cities and towns, of houses and farm buildings, is also entered under this class. Much of this land, therefore, is by no means waste, and while not directly productive as agricultural land, has a great utility for other purposes.

Leaving aside the question of the area of bog, barren mountain, &c., the cultivated and grazed area has in the foregoing summary table been divided into crops, hay and pasture. Hay holds an intermediate position between crops and pasture, and this simple threefold division is useful when the important question of the transfer of land from tillage to pasture is being considered. The following table shows the changes in the areas of crops, hay and pasture in each of the past ten years:—

—	Crops (excluding Hay).	Hay.	Pasture.	Total.
	Acres.	Acres.	Acres.	Acres.
1896, ...	2,610,796	2,302,624	10,333,527	15,176,747
1897, ...	2,568,804	2,176,142	10,462,310	15,207,256
1898, ...	2,530,380	2,174,470	10,470,119	15,174,969
1899, ...	2,508,638	2,118,907	10,375,012	15,002,557
1900, ...	2,493,017	2,166,716	10,263,373	15,223,104
1901, ...	2,462,469	2,178,592	10,577,238	15,218,299
1902, ...	2,435,703	2,168,464	10,635,424	15,239,591
1903, ...	2,410,813	2,224,165	10,597,721	15,232,699
1904, ...	2,373,995	2,390,160	10,686,639	15,450,794
1905, ...	2,361,721	2,294,566	10,597,966	15,254,253

This table presents several main points:—(1) The acreage under crops has continued to fall during the past ten years. In 1905, however, the rate of decrease was less than that in any previous year. (2) The area under hay has since the year 1900 shown a marked increase, amounting in the last three years to 126,042 acres. In the four years previous to 1900 a steady decline was recorded in the hay area. The increase since 1900 in the acreage of hay has almost equalled the decrease in the extent under crops. (3) While there has been in the past ten years a marked increase in the area under pasture, a distinction must be made between the earlier and later years of the decade. A great change in the area under pasture took place in the years 1896-1899, during which, according to the returns, over 240,000 acres were added to pasture. These three years saw also a decrease of over 180,000 acres in crops and a fall of over 80,000 acres under hay. Allow-

ing a margin for the difficulties which take place in the exact enumeration of pasture land on the one hand, and marsh, barren mountain, and waste land on the other hand, there is no reason to doubt the fact of a remarkable increase in pasture in these years. But since 1899, relative to its great extent, the total area under pasture has been on the whole stationary. Between 1899 and 1902 it increased by 60,000 acres, but between 1902 and 1905 it has receded by 37,000 acres. Even this slight net increase in pasture during the past six years is partly, if not wholly, due to the fact that there has been a decrease in the enumerated area of waste, barren mountain, and marsh. (4) The total area grazed and cultivated has increased since 1896 by over 77,000 acres. But for the reasons above shown, viz., that areas entered one year as bog land or barren mountain may be grazed by a few sheep in a succeeding season and be therefore entered as pasture, little significance can be attached to the increase in the total area of grazed and cultivated land.

Turning to a more particular consideration of the changes with regard to crops, the following table shows the area under cereals, green crops, and flax in 1904 and 1905:—

Cereal and Green Crops.							
—	1904.	1905.	Increase or Decrease.	—	1904.	1905.	Increase or Decrease.
	Acres.	Acres.	Acres.		Acres.	Acres.	Acres.
Wheat, ...	30,825	37,860	+7,035	Potatoes, ...	618,540	616,756	-1,786
Barley, ...	158,069	154,089	-3,984	Turnips, ...	286,833	282,106	-4,726
Oats, ...	1,078,772	1,066,896	-11,876	Mangels, ...	75,746	79,979	+3,233
Bern, ...	60	56	-4	Beet, ...	82	127	+45
Rye, ...	9,414	10,186	+771	Carrots, ...	2,111	1,742	-369
Beans, ...	1,890	1,671	-219	Parsnips, ...	616	626	+10
Pease, ...	185	253	+68	Cabbage, ...	50,665	42,696	-7,969
Total Cereal Crops, ...	1,278,129	1,271,190	-7,939	Ycctobes, ...	2,761	2,566	-195
				Rape, ...	3,481	3,090	-391
				Others, ...	21,660	22,182	+522
				Total Root Crops, ...	1,060,483	1,044,373	-16,110
				Flax, ...	44,293	46,158	+1,865

The decrease in crops in 1905 amounting to 12,244 acres is considerably less than that recorded in 1904, which amounted to 36,848 acres. The most marked changes which took place in the acreage in 1905 were, relatively to their total areas, the decline in barley and oats, the increase in wheat and rye, the decline in the area of potatoes and of turnips and mangels, the increase in cabbage, and the increase in flax.

With regard to the changes which have taken place in the areas under the several cereal and root crops in Ireland since 1851, the following tables distinguishing cereal from root crops give a summarised return for the several census years and for the year 1905.

TABLE showing the Area under the Principal Cereal and Root Crops and Flax in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1905.

Attention is drawn to the following particulars regarding the chief cereal and root crops :—

Wheat.

The area under wheat in Ireland, as in England and Scotland, has in proportion to its total acreage diminished to a much greater extent than that of any other cereal. During the past ten years, however, the area has fluctuated considerably, and in 1905 the total was almost the same as that re-

corded in the year 1896. In only ten counties in Ireland did the area of wheat in 1905 exceed 1,000 acres, and in only five counties did the area exceed 2,000 acres, namely, Down, 6,026; Cork, 4,903; Wexford, 4,246; Galway, 3,254; and Dublin, 3,084.

Oats.

The importance of oats amongst the cereal crops in Ireland may be seen from the fact that whereas the total area under cereals amounted to in 1905 1,271,190 acres, the area under oats amounted to 1,066,806 acres. Almost half of this area, namely, 518,889 acres, was grown in the province of Ulster, but the largest amount in any county was in Cork, namely, 94,823, as compared with 92,229 acres in Down. The decrease in 1905 of 11,966 acres mainly occurred in the provinces of Leinster and Munster.

Barley.

The area under barley decreased by 3,454 acres. At present the cultivation of barley on a large scale is confined to eight counties. In 1905 Wexford had by far the largest area of any county, amounting to 30,216 acres in 1905. Queen's County, which holds in 1905 the second place, had 18,969 acres; Tipperary, 17,885; Cork, 16,507; Kilkenny, 16,177; King's County, 15,037; Louth, 12,316; Kildare, 11,286. No other county had over 2,000 acres with the exception of County Carlow, which had 4,784 acres—a considerable area relative to the size of the county. The area under barley is thus at present largely limited to the province of Leinster. In 1905 Leinster had 72 per cent. of the total area and Munster 25 per cent., Ulster and Connaught having respectively 2 and 1 per cent. of the total area.

Potatoes.

The area under potatoes has declined by 88,910 acres during the past ten years. During the years 1904 and 1905, however, the decrease was at a much slower rate than in the years preceding. In 1904 it amounted to 1,853 acres and in 1905 to 1,785 acres. The area has declined in these two years in all the provinces save Ulster, where it has slightly increased. At present Ulster has over one-third of the total area of potatoes, viz., 256,928 acres, while the other provinces have approximately equal areas, viz., Munster, 127,953 acres; Connaught, 117,245; and Leinster, 114,629. Of the counties, Cork has the highest acreage in 1905, viz., 44,475; Down has 42,057; Mayo, 37,952; Donegal, 37,536; Tyrone, 36,592; Antrim, 36,161; Galway, 34,425; Londonderry, 30,106. The lowest acreage is that of County Kildare, 5,888 acres. Attention is directed to tables 17 and 18, pp. 120-127, in which is shown

the extent in statute acres under each description of potato. In 1905 the acreage under "Champions" amounted to 58·9 per cent. of the total area as compared with 61·3 in 1904. Since 1891, when it reached 79·7 per cent., the proportion of the potato area under "Champions" has shown, with some slight fluctuations, a gradual decline. The area under the "Up-to-Date" has increased from 59,260 acres in 1904 (9·6 per cent.) to 77,158 (12·5 per cent.) in 1905.

Turnips and Mangel Wurzel.

The area under turnips has also fallen considerably in the past ten years, though since 1901 the decline has been less marked. On the other hand, there has been a notable increase in mangel wurzel, and in consequence the total area of turnips and mangel wurzel during the past ten-year period has remained comparatively stationary. In the past four years, however, there has been a slight falling off in the area of mangels. The area under turnips in 1905 was in Ulster 94,829 acres, a decrease of 98 acres; in Leinster 90,431, a decrease of 3,523 acres; in Munster, 73,371, an increase of 495 acres; in Connaught, 23,474, a decrease of 600 acres.

Flax.

The area under flax in 1905 amounted to 46,158 acres—an increase on 1904 of 1,865 acres. Of the total acreage in 1905, 45,921 acres were grown in Ulster. In Leinster there were 94 acres; in Munster, 77 acres; in Connaught, 66 acres. The area in flax declined rapidly until 1898, when it was 34,469 acres. In the years following it has fluctuated considerably, rising in 1901 to 55,442 acres, and falling in 1902 to 49,742 acres, in 1903 to 44,685 acres, and in 1904 to 44,293 acres.

The decline in the area under the cereal, root, and flax crops is a feature which stands out in the history of agriculture not only in Ireland, but also in England and Wales, and, to a less degree, in Scotland. The following tables present summarily the changes in the areas under cereal, root, and flax crops since 1867, from which year comparative information is available:—

Ireland (area 20,350,725 acres).

—	1867.	1871.	1881.	1891.	1901.	1904.	1905.

(a) Not distinguished in Returns for 1867.

While crops have been declining, hay has in recent years shown an important increase. During, however, the first four years of the decade, 1896-1905, there was a considerable decline in the hay area, but in the last six years, and notably in the last three, the increase has been marked, amounting in the years 1903, 1904, and 1905 to a total exceeding 126,000 acres. It is of interest, further, to note how far the increase has been in hay on rotation land, and how far in the crop grown on permanent pasture. This is summarily shown in the following table:—

				HAY CROP.		
				Rotation Land.	Permanent Meadow.	Total.
				Acres.	Acres.	Acres.
1896,		656,071	1,547,353	2,203,424
1897,		637,128	1,539,014	2,176,142
1898,		652,040	1,522,430	2,174,470
1899,		624,153	1,491,744	2,115,897
1900,		607,380	1,508,325	2,115,705
1901,		617,330	1,561,362	2,178,692
1902,		603,468	1,561,966	2,165,434
1903,		627,210	1,596,906	2,224,116
1904,		631,745	1,628,412	2,260,157
1905,		638,626	1,645,871	2,284,497

From this table it appears that the increase in the latter part of the decade has been due to the extension of hay on permanent grass land. During the three years following 1896 a decline was marked in the acreage of hay on permanent

meadow, but a sharp recovery took place in 1900, and the area has steadily increased since that year, the present year showing an addition of over 37,000 acres as compared with 1904. On the other hand, the area of hay on rotation land has, while increasing in the earlier years, tended to fall, but in 1903 a considerable recovery took place, which has been maintained in 1904 and 1905. It will assist a right estimation of the changes which have been taking place in the growth of the hay area to recall the figures of the Census years from 1851, as shown in the following table :—

Total area under hay, 1851-1901.

1851	1,246,408
1861	1,546,206
1871	1,829,044
1881	2,001,029
1891	2,069,529
1901	2,178,592

The figures showing the distinction of hay grown on permanent land and on rotation land are only available from 1887.

The following table affords an estimate of the value of the principal root and cereal crops in Ireland in 1905. It does not, however, include the Irish Crops. the minor green crops, beet-root, carrots, parsnips, cabbage, vetches, rape, and other crops of smaller area, nor may the estimate arrived at be regarded as anything more than a broad approximation of value :—

QUANTITY AND VALUE of the principal IRISH CROPS in 1905.

CROP.	Estimated Produce in 1905.	Average Price.	Estimated Value of Crops.
	Thousand Cwt.	Per Cwt.	Thousand £.
Wheat,	766	4 10½	363
Oats,	17,358	5 1½	4,900
Barley,	3,077	7 1½	1,693
Born and Bye,	138	6 6	45

„ Permanent Pasture, ...	3,923	45 0	3,823
Total estimated Value of the Crops,	—	—	30,577

The season of 1905 was favourable so far as yield of crops was concerned. The estimates alike for corn and root crops and also for flax show a yield above the average. The season was, however, especially favourable to wheat and barley amongst the corn crops and to potatoes amongst roots. The yield of flax was considerably above the average. The yield of hay while lower than in the preceding year was an average crop. The following tables show the estimated yield for the principal crops per statute acre :—

**Produce of
Crops.**

YEARS.	Estimated Average Produce per Statute Acre.										
	Wheat.	Oats.	Barley.	Bere.	Rye.	Pota- toes.	Turn- ips.	Mangel Wurzel and Beet Root.	Cab- bage.	Flax.	Hay.
	Cwts. 112 lbs.	Cwts. 112 lbs.	Cwts. 112 lbs.	Cwts. 112 lbs.	Cwts. 112 lbs.	Tons.	Tons.	Tons.	Tons.	Scores, 14 lbs.	Fms.
1901,	181	159	149	143	130	43	176	176	103	337	24
Average 1895-1904,	175	155	173	137	128	40	153	166	101	294	23
1905,	202	163	199	141	135	56	167	176	104	371	23

The yield of the wheat crop was one of the highest on record, but was lower by over four bushels to the acre than the estimated yield of the crop in Scotland.

In barley the yield per acre in Leinster, in which province there was nearly 72 per cent. of the total acreage, showed the highest recorded during the past ten years except in 1902, as was also the case in Munster. In 1905 the yield in Ireland per acre of barley exceeded the yield in Scotland, whereas in 1904 the Scotch yield per acre was heavier than that estimated for Ireland.

In oats the yield was above that of the preceding year and above the ten year average. The other cereal crops also show a good return, and inasmuch as prices, while showing a slight decline on the year 1904, were better than in recent years, the year so far as cereals are concerned was satisfactory.

In the case of root crops, especially in potatoes, the yield was considerably above the average, and is the highest on record for Ireland. The yield was good throughout all the provinces. At the same time it has to be remembered that the price of potatoes in 1905 fell considerably as compared with the preceding year. The yield of turnips was not so good as in 1904, but despite the fact that the crop had suffered severely in certain districts from drought, was above the recorded average of the ten years. Mangels showed a yield somewhat above average and in general similar to that of the

preceding year. Hay, though not so heavy as in the preceding year, showed an average crop. The yield of flax was considerably above the average for the past ten years.

With regard to the estimates of the yield of crops, extensive inquiries have been made during the past year with a view to testing the existing system and to making improvements where necessary. The method which has been followed since the institution of the agricultural returns has been as follows:—The basis for each estimate is the Electoral Division, of which there are close on 3,500 in Ireland. A return is made for each division by the Constabulary, who are required to ascertain from representative farmers what they regard as the average yield of crops in their district. There is, it will be noted, an important difference between the enumeration of acreage and live stock statistics and the estimation of crop yields. In the case of the acreage of crops and the number of live stock it is necessary to obtain information from or about every holding. In the other case—that of the yield of crops—this is not necessary. To attempt to obtain information from every holder as to his several crops would involve a greatly increased expenditure and would not ensure a satisfactory result. What has been done in this, as in other countries, is to attempt to estimate the average yield of the several crops in each district, allowance being made for the good and bad land in the district. During the past year independent inquiries have been made in order to test the official returns. So far as the cereal and green crops, excluding potatoes, are concerned, independent inquiry confirms the fairness of the official estimates. With regard, however, to two crops, namely, hay and potatoes, the evidence obtained showed considerable difference of opinion. The areas of these crops are large and the variations in yield wide. During the year special inquiries were made among a number of farmers in every Poor Law Union in Ireland as to the average yield in their districts, and the estimates thus obtained would place the yield of hay somewhat lower, and the yield of potatoes generally higher than the official estimates. This difference of estimate in the case of these crops will be further tested in connection with the estimates in 1906. Meanwhile the possibility of systematically comparing the returns with independent estimates has been greatly advanced by the organisation of a system of local correspondents and by the assistance which can now be obtained from the Agricultural Instructors. At the same time an endeavour is being made to obtain as many returns of weighed crops as is possible, and it will greatly assist this work if landholders and farmers who may have weighbridges would communicate with the Department regarding the yield of crops. It is hoped that it will be possible to make arrangements whereby a number of crops may be weighed in each district, as, while weighed returns only afford exact information regarding a particular area, they help to form a more

accurate standard of judgment. At present there is little weighing of crops apart from what is done in connection with experimental plots.

Turning to the question of live stock, the year 1905 was not on the whole favourable. Prices continued to fall. At the same time during the summer there was a shortage of grass owing to the drought. In most classes of animals there was a falling off in numbers as compared with 1904. Horses increased by 4,064, reaching a total of 608,994, but there was a considerable decline in the number of cattle, sheep, and pigs. The following table shows summarily the changes in the number of live-stock which have taken place place in the period 1851-1905. At the same time it will be remembered that statistics of numbers are only one index of change, and that the improvement in stock, which can only be indicated, and then insufficiently, by careful records of weights and prices, is equally if not more important.

Years.	Horses.	Mules.	Asses.	Cattle.	Sheep.	Pigs.	Goats.	Poultry.
1851	521,396	21,608	136,981	2,967,661	2,123,128	1,034,807	235,313	7,479,028
1861	614,322	20,146	173,711	3,671,633	3,556,959	1,100,042	189,862	10,371,175
1871	538,095	19,517	186,373	3,076,372	4,233,435	1,621,423	231,373	11,717,182
1881	568,304	26,322	187,143	3,356,595	3,256,125	1,095,830	260,975	13,973,430
1891	626,819	23,690	216,303	4,448,511	4,722,613	1,267,712	236,237	15,276,125
1901	564,916	28,882	208,980	4,673,323	4,375,756	1,219,125	312,409	16,810,717
1902	679,765	29,397	242,862	4,782,221	4,215,865	1,327,616	303,664	18,401,324
1903	695,746	28,735	243,251	4,661,112	3,964,604	1,383,616	290,126	18,153,714
1904	694,930	29,821	244,155	4,676,715	3,827,969	1,315,126	290,222	18,295,969
1905	608,994	29,684	244,905	4,645,215	3,749,322	1,164,316	234,068	18,549,951

In recent years, since 1901, there has been a steady increase in the number of horses, especially in those under two years.

As regards cattle, the year 1902 marked the highest number reached in Ireland. In 1903 there was a considerable decline in numbers with a slight recovery in 1904. In 1905 the total number again fell, chiefly owing to the decrease in the number

of cattle under one year. The following table summarises the changes in the number of cattle in 1904 and 1905 :—

	CATTLE.				
	Milch Cows including Heifers in Calf.	Other Cattle.			Total Number of Cattle.
		Two years old and upwards	One year old and under two years.	Under one year.	
1904,	1,097,647	1,026,829	1,035,435	1,117,027	4,276,718
1905,	1,487,094	1,041,306	1,024,638	1,069,307	4,622,315
Increase,	14,477	.	.	.
Decrease,	10,583	.	10,797	24,820	31,503

A table showing the number of milch cows, including heifers in calf, in Ireland since 1854 will be found in Table S, page 20, from which it will be seen that the number in recent years, while showing a considerable increase as compared with the period from 1880 to 1890, is still below the record of several years between 1854 and 1877. Meanwhile the total number of cattle having increased, the proportion of milch cows remains much lower than in the earlier period. There was again a decrease in the number of sheep, though less marked than that recorded in the years 1902, 1903, and 1904. On the other hand, the number of pigs, which fluctuates considerably from year to year, showed a heavy falling off. The number of goats decreased in 1905 by 6,153. The numbers of poultry recorded showed an increase in 1905 of 292,092. The following tables summarise the main changes in 1905 as regards sheep, pigs, goats, and poultry :—

	SHEEP.					PIGS.					GOATS.
	One year old and upwards.			Under one year.	Total Number of Sheep.	Pigs kept for breeding purposes.		Other Pigs.		Total Number of Pigs.	
	Ewes kept for breeding purposes.	Other Ewes.	Tups and Wethers.			Sows.	Boars.	One year old and upwards.	Under one year.

—	POULTRY.				
	Turkeys.	Geese.	Ducks.	Ordinary Fowl.	Total.
1904,	976,238	1,725,621	2,808,785	12,654,515	18,205,269
1905,	1,018,599	1,714,416	2,939,088	12,876,844	18,549,051
Increase, ...	42,361	.	40,306	220,429	291,092
Decrease,	11,206	.	.	.

In regard to live stock, compared with England, Scotland, and Wales, the outstanding features in Ireland are relatively the large number of cattle and the very small number of sheep. The following table shows the number of live stock in England, Wales, and Scotland, in the year 1867 (from which date comparative statistics are available), in the Census years from 1871, and in the year 1905 :—

IRELAND—AREA.

—	1867.	1871.	1881.	1891.	1901.	1905.

(a) Statistics not collected until 1890.

In connection with the statistics of cattle, it is of interest to see the changes in the numbers of live stock exported from Ireland to Great Britain. Considerable fluctuations occur from year to year, and the exports are

shown in the following table for a period of twenty years :—
 NUMBERS of Cattle, Sheep, Swine, and Horses, exported from Ireland to Great Britain during the twenty years, 1886-1905 :—

YEARS.	Cattle.	Sheep.	Swine.	Horses.
1886, ...	717,389	734,213	421,235	23,779
1887, ...	689,253	543,568	480,020	27,638
1888, ...	733,716	637,584	544,072	29,323
1889, ...	609,543	613,687	473,551	31,324
1890, ...	631,896	626,381	603,162	34,122
1891, ...	630,302	533,175	503,584	33,396

1903, „ ...	897,645	825,679	562,020	27,719
1904, ...	772,303	730,366	505,066	27,500
1905, ...	742,131	700,626	362,333	30,723

The proportion of the number of cattle, sheep, swine, and horses exported to their total number in Ireland is shown for the past ten years in the following table :—

YEAR.	Percentage of Cattle, Sheep, Swine and Horses Exported, to Total Cattle, Sheep, Swine and Horses in Ireland.			
	Cattle.	Sheep.	Swine.	Horses.
1895,	182	167	409	55
1896,	175	181	435	63
1897,	167	193	524	66
1898,	179	194	470	66
1899,	171	200	505	72
1900,	162	197	504	63
1901,	138	193	459	45
1902,	201	250	481	44
1903,	192	209	412	47
1904,	165	193	384	45
1905,	161	187	312	50

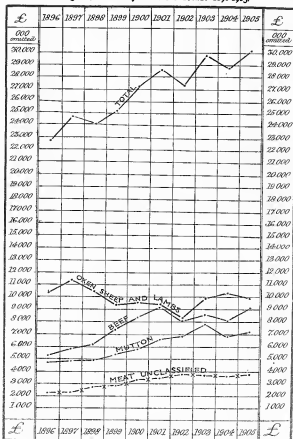

During the year 1905 the imports into the United Kingdom of live stock from foreign and colonial countries showed an increase in the number of cattle. In recent years the cattle imports from foreign and colonial countries while fluctuating have showed no signs of falling off, but the numbers of sheep and of pigs imported have greatly diminished, as will be seen from the following statement :—

Year.	Numbers.			Values.			
	Cattle.	Sheep.	Pigs.	Cattle.	Sheep.	Pigs.	Total.
	No.	No.	No.	£	£	£	£
1885, ...	373,078	750,886	16,322	7,046,477	1,625,029	63,248	8,734,754
1890, ...	642,596	368,458	4,626	10,505,525	696,312	14,474	11,216,311
1895, ...	415,565	1,065,470	321	7,183,040	1,782,564	698	8,966,292
1900, ...	496,645	382,822	-	9,012,194	610,125	-	9,622,319
1905, ...	565,139	183,984	150	9,635,806	278,752	300	9,914,859

On the other hand there has been a very great increase in the quantities of fresh beef and mutton imported.

Years.	Quantities.			Values.			
	Fresh Beef.	Fresh Mutton.	Fresh Pork.	Fresh Beef.	Fresh Mutton.	Fresh Pork.	Total.
	Owls.	Owls.	Owls.	£	£	£	£

Diagram showing the value in Thousands of Pounds Sterling of the Imports into the United Kingdom from Foreign Countries and British Colonies of all classes of Beef and Mutton (including Oxen, Sheep and Lambs for slaughter) in each year of the decade 1896-1905.

In this connection it should be said that the year 1905 was noteworthy for the fact that for the first time the supplies of fresh beef from Argentina were greater than those from the United States, and also for the very considerable development in the shipments of "chilled" as well as of "frozen" beef from the former country.

The increasing degree of foreign and colonial competition with the Irish export trade to Great Britain is indicated by the accompanying chart, which shows the value of the foreign and colonial imports into the United Kingdom of all classes of beef and mutton (including oxen, sheep, and lambs) in each of the ten years, 1896-1905.

The inquiries made in the preceding eighteen years relative to the extent to which bee-keeping is followed in Ireland were repeated in 1905, and according to the returns received, there would appear to have been a decrease of 14·1 per cent. in the quantity of honey produced in 1904 as compared with the preceding year, the returns for which showed a decrease of 31·4 per cent. as compared with the quantity in 1902. The quantity of honey produced, according to the returns, was 308,866 lbs.; of this, 84,157 lbs. were produced in the Province of Leinster, 92,071 lbs. in Munster; 84,635 lbs. in Ulster; and 48,003 lbs. in Connaught. Of the 308,866 lbs. 219,433 lbs. were produced "in Hives having Movable Combs," and 89,433 lbs. "in other Hives." It was stated that 114,410 lbs. was "Run Honey," and 194,456 lbs. "Section Honey." The number of stocks brought through the winter of 1904-1905, amounted to 22,291; of which 13,294 were in bives having movable combs, and 8,997 in other hives. According to the returns collected, there were 3,083 lbs. of wax manufactured in 1904, of which 2,066 were from hives having movable combs, and 1,017 lbs. from other hives. The returns received in 1904 gave the number of swarms at work during the season of 1903 at 22,220; the quantity of honey as 359,624 lbs.; the number of stocks brought through the winter of 1903-1904 as 26,474; and the quantity of wax manufactured in 1903 as 3,580 lbs.

In connection with the statistics of bee-keeping, it should be stated that from the nature of the case there is great difficulty in obtaining returns which approach completeness. The collection, therefore, of information by local societies of bee-keepers, and their co-operation with the Department in making the returns as complete as possible is of great importance. Few countries have any satisfactory record of their production of honey, but, with co-operation and organisation among bee-keepers, the difficulties can largely be overcome.

FORESTRY.

Of the total area of Ireland, about 1·5 per cent. is under woods. The woods in England are 5·3 per cent., in Scotland 4·5, and in Wales 3·9 per cent. of the total areas.

Since 1851 (with the exception of the year 1852) the acreage under woods and plantations has been ascertained annually in connection with the Agricultural Statistics; but, until the year 1890, the total extent was the only information sought for, no particulars as to the kind of trees having been obtained. In that year returns giving the latter information were collected, and the results were published in a table, showing, by counties, the distribution of the various descriptions of trees.

The following table shows the acreage under woods and plantations in the year 1851, and in each year from 1853 to 1905, inclusive:—

Acreage under Woods and Plantations.

Year.	Statute Acres.	Year.	Statute Acres.	Year.	Statute Acres.
1851	304,906	1870	320,823	1889	328,383
1852	No Return	1871	324,890	1890	327,601
1853	305,221	1872	325,703	1891	311,664
1854	306,332	1873	323,656	1892	300,586
1855	306,476	1874	322,388	1893	307,286
1856	306,036	1875	313,666	1894	306,376
1857	312,817	1876	324,152	1895	308,928
1858	312,571	1877	329,536	1896	307,497
1859	315,874	1878	328,687	1897	307,441
1860	315,324	1879	326,846	1898	307,601
1861	316,097	1880	329,558	1899	328,406
1862	317,345	1881	328,703	1900	311,648
1863	317,124	1882	328,000	1901	328,711
1864	318,953	1883	331,345	1902	303,663
1865	322,182	1884	332,606	1903	304,662
1866	327,890	1885	328,447	1904	302,118
1867	323,420	1886	329,692	1905	301,132
1868	322,258	1887	329,363		
1869	326,461	1888	331,537		

The above statement shows that, during the period 1851-1905 the number of acres under woods and plantations varied from 339,858 in 1880 to 301,132 in 1905, and that, comparing 1905 with 1851, there has been a decrease of 1·2 per cent., the extent in 1851 being 304,906 statute acres, and in 1905, 301,132 acres,—the lowest for any year during the period covered by the table.

In addition to the information regarding the total area under woods and plantations, returns were obtained in 1905 showing the proportion of the area entered under this heading occupied by each of the various kinds of trees. According to these returns 44,227 acres of the total area (301,132 statute acres) under Woods and Plantations were under Larch, 31,281 under Fir, 16,201 under Spruce, 3,230 under Pine, 22,526 under Oak, 7,521 under Ash, 9,533 under Beech, 2,613 under Sycamore, 2,756 under Elm, 3,509 under Other Trees, and 157,735 were returned as under Mixed Trees. The area under Woods and Plantations in Leinster was 91,818 acres; in Munster, 102,522 acres; in Ulster, 56,921 acres; and in Connaught, 50,365 acres.

The inquiries as to planting and felling operations instituted in 1890, and continued in the thirteen following years, were repeated in 1905. According to the returns, during the year ended 30th June, 1905, 635 acres were planted with trees, 141 acres less than the extent planted in the preceding year. In connection with this subject, it may be here mentioned that from the passing of the Act 29 and 30 Vic., cap. 40, to the 31st March, 1904, 143 loans, amounting to a capital sum of £33,150 were sanctioned for planting for shelter. Two loans were sanctioned in the last year of that period.

The number of trees felled, both for clearance and for thinning plantations, amounted in 1905 to 737,638. The area returned as cleared is 896 acres. It will be noticed that while, according to the Table on the preceding page, there would appear to have been a decrease of 1,986 acres under woods and plantations, the statistics of planting and felling show only a decrease of 261 acres. There is thus a discrepancy in the figures, but, as has been pointed out in previous reports, considerable difficulties exist in ascertaining the area under woods and plantations from a very large number of persons, many of whom are imperfectly acquainted with the acreage under timber on their holdings. Of the trees felled, 420,716 were used for "propping," which appears to have been the chief purpose to which the timber of almost all descriptions was applied. The numbers applied to the principal specified uses comprise also:—8,530 trees for sleepers, 32,340 for paling, 9,500 for fuel, 5,410 for furniture and building purposes, 3,394 for carts, waggons, &c., 4,220 for butter and egg boxes, 2,400 for boards, and 1,300 for piling.

HOLDINGS AND OCCUPIERS.

One of the questions of greatest importance in the agricultural economy of the country is the distribution of land. From year to year this is constantly undergoing modification, and the following summary presents the changes in the size of holdings in 1904 and 1905:—

Size of Holdings.	Number in 1904.	Number in 1905.	Increase or Decrease in 1905.	
			Increase.	Decrease.
Not exceeding 1 Acre, ...	75,791	75,091	2,900	—
Above 1 and not exceeding 5 Acres, ...	62,135	62,126	—	9
" 5 " " 15 " ...	154,290	154,069	270	—
" 15 " " 30 " ...	134,480	134,370	—	110
" 30 " " 50 " ...	74,320	74,611	292	—
" 50 " " 100 " ...	67,683	67,707	24	—
" 100 " " 200 " ...	22,603	22,627	—	78
" 200 " " 500 " ...	8,096	8,046	—	50
Above 500 Acres, ...	1,527	1,526	—	1
Total, ...	551,224	553,804	2,580	—

From this statement it will be seen that the most noticeable features in 1905 are the increase of holdings under one acre, the increase also in the holdings between 5 and 15 acres and between 30 and 50 acres, and the decrease in the number of holdings exceeding 100 acres in extent—a marked feature also in the returns of 1904.

With regard, however, to the holdings not exceeding one acre, in which an increase of 2,300 is recorded in 1905, this information is mainly of interest from a social and economic point of view. So far as the purposes of agriculture are concerned, holdings not exceeding one acre may be excluded, for, apart from the difficulty to the enumerator of determining what plots of land not exceeding one acre may be regarded as agricultural, this class is mainly composed of gardens, labourers' allotments, &c., while the total area distributed amongst the 78,000 holdings is estimated to amount to less than 40,000 acres. The great increase which has taken place since 1851 in the number of holdings not exceeding one acre is shown in the following table:—

Number of holdings not exceeding one acre, 1851-1905.

—	Leinster.	Munster.	Ulster.	Connaught.	Ireland.
1851, ...	16,017	8,458	6,960	6,273	37,708
1861, ...	14,467	9,325	9,270	8,019	41,061
1871, ...	16,864	11,172	12,739	7,703	48,478
1881, ...	17,289	11,323	14,732	7,146	50,390
1891, ...	17,696	14,922	17,026	5,384	55,028
1901, ...	25,523	22,582	19,699	6,634	74,338
1905, ...	27,324	24,352	19,732	6,003	78,001

From this statement it will be seen that, of the 78,001 holdings returned as "not exceeding" one acre, 51,676 are in Leinster and Munster. During the past fifteen years the increase in the number of these holdings has been especially marked in Leinster and Munster. In Ulster since 1891 the numbers have risen slowly, though in 1905 there has been an increase of 605. In Connaught, where the number of such holdings is small, and where for decades it was dwindling, there has been a general increase recorded in 1904 and 1905.

The important consideration, however—so far as agriculture is concerned—is the change in the number and size of the holdings exceeding one acre. The movement in the

total number of these holdings may be shown by Census periods since 1841, in the following table :—

Total number of holdings exceeding one acre, 1841-1901.

—	Leinster.	Munster.	Ulster.	Connacht.	Ireland.
1841,	124,780	163,335	236,694	155,842	680,651
1851,	122,871	159,494	219,349	116,694	618,408
1861,	116,973	118,333	207,635	127,543	570,484
1871,	111,078	114,753	195,828	121,883	543,542
1881,	103,999	112,604	183,079	119,709	519,391
1891,	105,311	111,347	183,929	116,495	516,082
1901,	104,388	113,586	181,894	116,069	515,937

From this table it will be seen that for over fifty years the number of holdings continued to fall, at first violently, later more slowly. In the last decade this downward movement has spent itself, and the number of agricultural holdings has remained comparatively stationary, recently tending slowly to rise. The above table, showing the changes since 1841, may be compared with the following table, which brings out the stationary character of the last decade :—

Total number of holdings exceeding one acre, 1896-1905.

—	Leinster.	Munster.	Ulster.	Connacht.	Total.
1896,	104,569	111,138	181,976	116,169	513,852
1897,	104,330	111,518	181,563	116,375	513,786
1898,	104,198	111,670	182,172	116,281	514,321
1899,	103,240	112,346	182,398	116,102	514,086
1900,	104,094	112,391	182,818	116,156	515,459
1901,	104,388	113,586	181,894	116,069	515,937
1902,	104,652	113,638	181,784	116,078	516,152
1903,	104,130	113,360	181,861	116,407	515,758
1904,	104,653	113,412	181,694	116,374	516,133
1905,	104,624	113,376	181,694	116,709	516,403

No less important are the changes which have been taking place within recent years in the number of holdings in the several classes. There has been, on the one hand, a steady decline in the number of holdings exceeding one hundred acres, amounting in the years 1904 and 1905 to 286. On the other hand, in these two years an increase has taken place in the number of holdings between 30 and 100 acres—amounting to a total of 506. Of the holdings less than, and not exceeding 30 acres, the number of those between one and five acres in extent has slightly declined, while the number of holdings between 5 and 30 acres in extent has fluctuated—falling slightly in one year and rising in another. The main points with regard to the number and distribution of the several classes of holdings exceeding one acre may be briefly presented in the following summary :—

Distribution of Holdings.

Holdings above one and under five acres, amounting in 1905 to 62,126, are comparatively evenly distributed among the four provinces. Ulster has 20,226, Leinster 17,467—a large proportion relative to its total number of holdings—Connaught and Munster respectively 12,254 and 12,179. During the past ten years the total number of these holdings has been remarkably stationary, in recent years slightly declining. The total area over one and not exceeding five acres is estimated at approximately 224,000 acres.

This is the largest of the several classes of holdings in Ireland, amounting in 1905 to 154,560. In 1904 a decrease of 341 was recorded. This year there is an increase of 270. Regarding the number and proportion of these holdings there is a marked contrast between, on the one hand, Ulster and Connaught, and on the other hand, Leinster and Munster. In Ulster more than one-third of the total number of holdings over one acre belongs to this class, and in Connaught the proportion is still greater, whereas in Leinster such holdings amount to less than one-fourth, and in Munster to little over one-sixth. The total area of the holdings "above five and not exceeding fifteen acres" is estimated at approximately 1,623,000 acres.

In 1905, holdings above fifteen and not exceeding thirty acres numbered 134,870. This class since 1851 has been in number remarkably stationary, gradually falling, and of recent years slightly increasing. As in the holdings between five and fifteen acres, so in those between fifteen and thirty acres, Ulster and Connaught have absolutely and proportionately a much larger number than Leinster or Munster. But in the present case the disparity is not so great, Ulster

having in 1905 53,652, Connaught 34,470, Munster 24,357, Leinster 21,891. The total area of such holdings is estimated at approximately 3,008,000 acres.

It will thus be seen that in Ireland out of a total of 515,803 holdings exceeding one acre, 351,056 are of a size not exceeding thirty acres, and comprise less than one-fourth of the total area of the country.

The total number of holdings in this class amounted to 74,611 in 1905, an increase of 282 on the number of 1904. The change has been slight since 1851, when the number was 70,093, and the increase has occurred mainly in

Above 30 and not exceeding 50 Acres.

Ulster and Connaught, and, to a much less degree in Munster. In Leinster, on the other hand, this class has tended to decrease. The numbers for the several provinces in 1905 were as follows:—Ulster, 25,195; Munster, 22,397; Leinster, 15,183; Connaught, 11,836. The total area of these holdings may be estimated approximately at 3,024,000 acres.

The total number of holdings in this class in 1905 was 57,707 an increase of 24, following an increase of 237 in 1904. Since 1851, when there were 49,940 such holdings, there has been a considerable increase, but the past

Above 50 and not exceeding 100 Acres.

decade has done little more than maintain the number reached. Munster has much the largest proportion of such holdings, viz., 22,790; Ulster, 14,552; Leinster, 14,087; Connaught, 6,278. The total area included in this class may be estimated approximately at 4,257,000 acres.

The total number of holdings in this class in 1905 was 22,857, of which 9,316 were in Munster, 6,949 in Leinster, 3,623 in Ulster, 2,969 in Connaught. In 1851 the number was 19,753, and while in the earlier decades

Above 100 and not exceeding 200 Acres.

there was a considerable increase, in recent years a slight decrease has been evident. The present area of these holdings may be estimated approximately at 3,447,000 acres.

While the number of these holdings increased considerably in the decade 1851–1861, it has since tended to fall. In 1905, of the 8,046 holdings in this class there were in Leinster, 2,771; in Munster, 2,636; in Connaught, 1,600;

Above 200 and not exceeding 500 Acres.

and in Ulster, 1,039; comprising a total area which may be estimated approximately at 2,764,000 acres.

Holdings over 500 acres have gradually declined during the past twenty years. At present out of a total of 1,526, there are in Connaught, 475; in Leinster, 425; in Munster, 352; and in Ulster, 274. The total area may

Holdings over 500 Acres.

be estimated approximately at 1,967,000 acres.

In general, regarding the changes in the size and distribution of the holdings in Ireland, three periods may be distinguished during the past sixty years. The first, in which change was catastrophic, had closed before the Census of 1851. On the one hand the number of holdings between 1 and 15 acres in extent—amounting in 1841 to 562,235 was in 1851 279,937—roughly reduced by half; on the other hand the number of holdings of an extent exceeding 15 acres was greatly increased. The number of holdings between 15 and 30 acres rose from 79,342 in 1841 to 141,311 in 1851. The number of holdings exceeding 30 acres from 48,625 in 1841 to 149,090 in 1851. The second period extending from thirty to forty years, marked a still further decline in the number of holdings over 1 and not exceeding 15 acres, with a corresponding increase in the larger classes of holdings. In the third period, that of the past twenty years, excluding holdings not exceeding one acre, there has been a comparative absence of change. From year to year fluctuations sometimes considerable are seen, but when the view stretches over a series of years no continuous changes can as yet be discerned.

It will be observed from the study of the tables that Ulster is pre-eminently the province of small holdings. Altogether it has in 1905 only 19,488 holdings exceeding 50 acres in extent, whereas it contains 162,206 holdings of an extent above 1 and not exceeding 50 acres. Moreover, of these the greater number are between 5 and 30 acres in area. On the other hand, Munster is pre-eminently the province of holdings between 30 and 200 acres. In 1905, of its total number of holdings exceeding one acre, viz., 113,376, no less than 54,503 were of a size above 30 and not exceeding 200 acres. Further, it may be noted that among these holdings the proportion not only of those above 50 acres, but of those exceeding 100 acres in area is, when compared with the other provinces, relatively large. In Leinster there is no such predominance of small or large holdings, but every class is well represented. Leinster has, however, the largest number of holdings, exceeding 200 acres. In Connaught the most striking feature is the contrast, marked even more strongly than in Ulster, between the large number of holdings from 5 to 30 acres in extent, and the small number between 30 and 100 acres. To the former class belong more than two-thirds of the total number of holdings in Connaught exceeding one acre, whereas of holdings from 30 to 100 acres there is a much smaller proportion than in any other of the provinces. On the other hand, Connaught has the largest number of holdings, "above 500 acres." The following tables present a synopsis of the distribution of the several classes of holdings among the counties and provinces in Ireland.

TABLE A.—Showing by Counties and Provinces, in Percentages, the Proportion of each group of Classified Holdings in 1905, 100 being taken to represent the total number of each class of holding in Ireland.

In many instances landholders occupy more than one farm, and in other cases farms extend into two or more townlands, the portion in each townland being enumerated and classified as a separate holding. With the view, therefore, of ascertaining the number of occupiers, and of classifying them according to the total extent of land held by each, each enumerator is required to furnish the name of every landholder residing in his district who has two or more farms, or whose farm extends into two or more townlands, together with the area of each portion and the locality in which it is situated. From the number of actual occupiers thus arrived at, it appears that in 1905 there were 593,804 holdings in the hands of 549,117 occupiers.

The total number of separate holdings and of occupiers in each province in 1904 and 1905 respectively were :—

PROVINCES.	Number of Separate Holdings.		Number of Occupiers.	
	1904.	1905.	1904.	1905.
Leinster, ...	130,330	131,345	117,396	118,709
Munster, ...	137,182	137,728	124,610	125,546
Ulster, ...	200,811	201,426	167,897	168,721
Connaught, ...	122,901	123,302	115,699	116,090
Total, ...	591,224	593,804	545,402	549,117

If the holders of land not exceeding one acre are excluded, the following table shows the number of occupiers in the several provinces during the ten years 1896–1905.

PROVINCES	1896.	1897.	1898.	1899.	1900.	1901.	1902.	1903.	1904.	1905.
Leinster, ...	92,239	91,945	92,007	94,267	92,039	91,534	91,765	91,372	91,411	91,033
Munster, ...	90,915	90,960	100,047	102,944	101,028	101,309	100,925	101,062	101,000	101,401
Ulster, ...	171,022	170,663	170,667	170,795	170,743	168,545	168,325	168,951	168,960	169,172
Connaught, ...	102,364	100,530	100,563	100,668	101,646	100,316	100,783	100,324	100,207	100,707
IRELAND, ...	472,920	472,077	472,904	475,694	473,456	470,694	470,397	470,629	470,627	471,968

From this table it will be seen that the number of occupiers has remained comparatively stationary during the past ten years, falling to the lowest point in 1901 since when it has shown a slight increase.

I have the honour to be, Sir,

Your obedient servant,

W. G. S. ADAMS,
*Superintendent of Statistics
and Intelligence Branch.*

DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND,
UPPER MERRION-STREET, DUBLIN.
September, 1906.

TABLES

SUMMARY

TABLE A.—Showing the DIVISION of LAND in IRELAND in

Division of Land,	1841.	1851.	1861.	1871.	1881.
	Statute Acres.	Statute Acres.	Statute Acres.	Statute Acres.	Statute Acres.
Under Crops (including Meadow and Clover),	13,464,300	5,832,951	6,890,536	5,321,637	5,195,375
Under Grass,		3,748,577	3,523,529	30,071,285	10,675,424
Woods and Plantations,	374,482	304,906	315,597	324,990	323,703
Barren Mountain Land,	6,489,971	5,416,319	4,838,091	4,331,041	2,117,072
Bog and Marsh,					1,720,026
Waste Land, &c.,					891,503
Total,					

NOTE.—The information for 1841 and 1851, respectively, has been obtained from Agricultural

† The differences between the total area entered for 1891, 1901 and 1905 and that given countries, and the inclusion of some reclaimed

TABLE B.—Showing the GROWTH of PASTURE and the SHRINKAGE of CROP AREAS in IRELAND in the years 1880, 1900 and 1905, as compared with the year 1860.

YEAR.	Total Area.	"Cultivated Area" (Crops and Grass.)	Crops (other than Meadow and Clover.)	Meadow and Clover.	Grass.
1860,	20,284,393	15,452,773	4,375,821	1,076,952	2,633,694
1880,	20,327,764	15,390,192	3,171,329	1,909,825	10,259,138
1900,	20,332,344	15,222,104	2,493,017	2,165,715	10,563,372
1905,	20,360,735	15,354,223	2,361,721	2,294,506	10,597,906

TABLE C.—Showing the PERCENTAGES of LAND in IRELAND devoted to the several classes of CROPS in the years from 1895 to 1905.

—	Cereals.	Green Crops.	Flax.	Meadow and Clover.
1895,	29.6	23.6	1.9	45.0
1896,	29.3	23.7	1.5	45.5
1897,	29.7	23.5	.9	45.9
1898,	29.6	23.5	.7	46.2
1899,	29.6	23.8	.8	45.8
1900,	28.9	23.6	1.0	46.5
1901,	28.6	23.3	1.2	47.0
1902,	28.4	23.3	1.1	47.2
1903,	28.2	22.9	.9	48.0
1904,	27.6	22.7	.9	48.8
1905,	27.2	22.4	1.0	49.3
Net Changes,	- 2.2	- 1.2	- 0.9	+ 4.3

TABLES.

the years 1841, 1851, 1861, 1871, 1881, 1891, 1901, and 1905.

1841.	1851.	1861.	Division of Land.
Statute Acres.	Statute Acres.	Statute Acres.	
4,818,381	4,631,051	4,656,227	Under Crops (including Meadow and Clover), Under Grass.
10,298,654	10,577,238	10,267,996	Woods and Plantations.
311,554	399,741	301,123	Barren Mountain Land.
{ 2,211,361 1,343,923 929,491 }	{ 2,223,420 1,374,362 1,017,688 }	{ 2,264,250 1,474,908 1,066,717 }	Bog and Marsh.
20,533,344†		20,356,724	Waste Land, &c.
			Total.

the Census Reports for those years; and that for the subsequent periods from the Statistics.

for the other years is owing to the adoption in the later years of revised areas for some estuaries in the County of Wexford.

TABLE D.—Showing the number of Statute Acres devoted to ARABLE and PASTORAL uses in each COUNTY and PROVINCE of Ireland and for the whole Country in 1905.

COUNTIES.	Arable (Statute Acres).	Pastoral (Statute Acres).	COUNTIES.	Arable (Statute Acres).	Pastoral (Statute Acres).
Carlow,	52,298	144,406	Antrim,	172,134	303,967

Total of IRELAND, .	791	337	254	408	283

Owing to the difficulty of obtaining returns in certain cases, it is impossible to guarantee that the above figures are complete.

Quantity of Milk supplied to Creameries. Estimated* 140,815,000 gallons.

Quantity of Butter produced in Creameries. Estimated 521,000 cwts.

Quantity of Cheese, Cream, and Condensed Milk. The returns obtained do not enable any satisfactory estimate to be formed as to the total quantities of these several commodities produced.

* This total includes the Milk used for the production of Cheese, Cream, and Condensed Milk.

(a) Yearly labourers get from 6s. to 7s. 6d. per week. Servant boys and servant girls get from 28s. to 34s. a year. Girls are not employed by the day.

(b) Labourers employed in this district are constant all the year round, and the wages seldom varies, except in the case of men.

(c) With diet.

(d) No meals.

(e) In most cases labourers get diet in addition to wages. There are very few boys, women, or girls employed.

(f) With diet. Women and girls are not employed at agricultural work, except for six or eight weeks in harvest.

(g) With diet.

(a) There is no employment here in winter for women or girls.

(b) Few people employ agricultural labourers in this district, except for short periods, when breakfast and dinner are allowed in addition to the wages set forth.

(c) Little or no employment for agricultural labourers.

(d) Very little employment for women or girls in winter, except those who are employed for twelve months at a fixed rate.

(e) Very few women or girls employed, save during harvesting operations.

(f) Labourers are in all cases supplied with dinners. The higher wages are given only to mowers. Boys are seldom employed in winter, save where permanently engaged.

(g) Girls are seldom engaged by the day but are generally hired for the "Season"—nine months' term.

(a) No women or girls employed except in Ailbeary sub-district, and that during the summer months only.

(b) No women or girls employed.

(c) Very few agricultural labourers employed.

(d) Very few women or girls employed.

(e) Wild food.

(f) Women or girls not employed in winter.

(g) Women and girls are employed for a few weeks only in spring and harvest.

(h) Without board and lodging, except in a few instances. Women and girls practically never employed here; when employed wages about the same as men's.

(i) Very few women or girls employed.

(j) No winter labour for women and girls.

(k) There are not many labourers employed in this district, as there are only small farmers in it. Very few women or girls employed.

(j) Without support. Girls not employed.

(k) No employment for women during winter months.

(l) No women or girls employed at agricultural labour in Ardara, Crossmolina, or Cloghane sub-districts; in fact few employed in this district, especially in winter.

(m) Very little employment for women and girls save in the harvest.

(n) Rate of wages low in this district. Most of the men and boys who are able to do so go to Scotland. No women or girls so employed during winter, and not many during summer. They are generally hired by the quarter at from £1 5s. to £1 10s.

(o) Very little employment for agricultural labourers.

(p) Not much employment for agricultural labourers. The holdings being small, the tenant's family do all the work. All fully grown agricultural labourers migrate to England in February and March. Hardly any women or girls employed, except for a short period at harvest time.

DUBLIN CASTLE,

12th September, 1906.

SIR,

I have to acknowledge the receipt of your letter of the 10th instant, forwarding, for the submission to His Excellency the Lord Lieutenant, the Tables and Detailed Report on the Agricultural Statistics of Ireland for the Year 1905.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

THE SECRETARY,

DEPARTMENT OF AGRICULTURE AND

TECHNICAL INSTRUCTION,

UPPER MERRION STREET.

DUBLIN.
